

SUN KING LCD SCUFFER

THE NEXT GENERATION JET STARTER SCUFFER

Salem Republic Rubber is now pleased to offer the SunKing LCD™ Scuffer for your jet starter hose applications. It provides greater UV and ozone resistance, reduced snag hazards and improved end-to-end strength, while still incorporating the Low Coefficient of Drag (LCD) spiral bumper.

Vigorous product development and testing proves that the SunKing LCD provides...

- **Improved UV and ozone resistance** – the product is manufactured with a pigmented polyester resin as opposed to the fabrics used in other scuffers.
- **Reduced snag hazards** – gained by braid construction and the advanced manufacturing technology of Salem Republic Rubber.
- **Enhanced end-to-end strength** – with one continuous braid, from end-to-end.

- Available with **GREEN HORNET** striping for high visibility or military applications.
- Multiple color configurations possible.
