

LOADER HOSE

LIGHT-WEIGHT, SMOOTH BORE, TOUGH, HIGH-FLEXIBILITY HOSE

Salem-Republic's Light-Weight and new Superlite Series smooth bore hoses are designed with high-tensile synthetic fabric, reinforced with a helix of tempered spring-steel flat wire. The tough, abrasion-resistant cover withstands ozone and weathering for lasting service. High-strength, thin-wall construction provides up to 40% weight savings over other designs. *These hose offer unique versatility for many cost-saving operations such as...*

- whip ends
- easy-handling line hose
- elbows and connectors
- industrial vacuum installations including large diameter manifold hose and smaller diameter take-off runs.

Light-Weight Hose

(V6339-6768D-F1203)

Smooth, heavy-gauge 1/8" tube. An economical and light-weight alternative to the H.D. Vol-U-Flex. For line hose service, industrial plant vacuum and heavy-duty whip end use.

Superlite Plus Hose

(V6339-6768D-F0902)

Light-weight construction using 3/32" SBR for tube and cover. For light-duty whip end; work hose service, and industrial plant vacuum systems. Handles easily like ducting for all types of vacuum service.

TUBE Static-conducting NR/SBR.

CARCASS High-tensile spun polyester with tempered spring-steel flat wire helix.

COVER Tough abrasion-resistant SBR withstands ozone and weathering.

ENDS Plain cut or soft cuffs.

DIAMETER	APPROX. WEIGHT/FOOT		MIN. BEND RADIUS
	LIGHT WEIGHT	SUPERLITE PLUS	
1.5"	.68	.60	3.0"
2.0"	.87	.75	3.5"
2.5"	1.08	.92	4.5"
3.0"	1.26	1.10	5.5"
3.5"	1.72	1.50	6.5"
4.0"	2.00	1.75	7.5"
5.0"	2.67	2.40	9.5"
6.0"	3.31	3.00	12.0"

All vacuum hose, including leaf collector, are available in food-grade compounds.

We can also respond to your other special requirements... We are a custom engineered hose manufacturer.
