engineered elastomeric linings

salem-republic rubber company

Elastomeric Lining

SR660BTE

Excellent chemical, abrasion, and tear resistance, 60 durometer natural rubber with tie gum. This is a highly reinforced compound.

SR690BTE

Semi-hard natural rubber flexible ebonite lining offering maximum resistance to many chemicals, with tie gum

SR613BNE

Semi-hard natural rubber flexible ebonite lining offering maximum resistance to many chemicals, without tie gum.

SR640TNE

High grade 40 durometer tan natural rubber. A pure gum lining possessing special chemical and abrasion resistant properties.

SR6490TNE

40 durometer tan natural rubber lining possessing abrasion and chemical resistance.

SR208BNE

Chlorobutyl lining without tie gum formulated for general chemical service with good resistance to service temperatures up to 250° F.

SR255BTE

Chlorobutyl rubber with black tie gum. Special lining for general chemical service with good resistance to heat, and some oxidizing chemicals.

SR960BNE

Neoprene lining with good abrasion, weathering, and corrosion resistance, without tie gum.
